

# Terrien family history introduction

Greetings!

This genealogy collection is based on the family histories of Raphael Terrien and Florence Albers, my Grandparents. Ray and Florence were born and married in Brown County, Wisconsin and raised their family for the most part in Muskegon, Michigan.

I did most of this research in the early and mid 1990s at the State of Wisconsin Historical Library at Madison.

I transferred all my notes to a computer program that was popular at the time, a program that hasn't existed for at least 15 years. I do have printed copies that I am beginning to scan so as to be able to put them on line. Scanning makes these files quite large. Updates to this site (tracked below) will try to minimize these file sizes.

I have collected a great deal of research materials relevant to our family history. As I scan these I will add new links to this home page as they develop.

A note about using these files: Some of the scanned family history charts can be difficult to read using standard monitor settings. You can use the enlargement options in the software or on your monitor to make the info bigger where needed.

This research is labor of love, all done pre-internet. Now that ever-increasing information capabilities are with us, I hope my collection of family histories will serve as a guide to learning more, and as an inspiration for growing wonderful new family stories for generations to come.

My best to you all,

Rick Terrien
